

# COLOUR VARIATION

Colour is an integral component of good interior design, and when it comes to rugs selection of colour will unify and bring disparate individual items of the interior scheme together harmoniously.

Selecting colours, particularly in living spaces, can sometimes require restraint and careful consideration to ensure that the result can be lived with and enjoyed in the long term.

When it comes to hallways however, commanding use of colour for a runner can provide an amazing first impression and “wow” factor to an entrance hall.

The Source Mondial Colour Variations Collection features 2 ranges which focus on variation and graduation of colour. These ranges are our stunning “Volcano” and “Sunset” rugs.

“Volcano” is available in 2 qualities, either hand-tufted or hand-knotted in NZ wool and feature a striking graduation of colour whether a tonal graduation with a fade out/fade in effect or graduated change from 1 colour to another.

“Sunset” rugs are hand-knotted in a NZ/Italian blend. The wool used to create our Sunset rugs is hand-spun and then hand-dyed in such a way as to achieve a subtle and beautiful variation of colour. Our “Sunset rugs” are available as either a variation of one colour or in the multi-coloured designs of the gorgeous “Broken Sunset” and “Moeraki Sunset” rugs, which are both particularly effective as runners.

Source Mondial holds an impressive number of rugs in stock, but if we don’t hold the right variation right in stock for you, a member of our specialist team would be pleased to advise and assist with achieving the perfect for you and your home.
