COLOUR VARIATION CATALOGUE

Considered use of colour is an integral component of good interior design, and this is particularly pertinent when it comes to the selection of a rug.

Rugs are an essential and commanding element of an interior scheme. They play a pivotal role in bringing all the disparate pieces of an interior scheme together, thereby anchoring and harmonising the space – and so colour selection when it comes to a rug is critical.

Selecting rug colour, particularly in living spaces, can sometimes require restraint and balance to ensure that the result can be lived with and enjoyed in the long term.

The Source Mondial Colour Variation Collection offers an impressive selection of rugs which focus on lustrous colour variation and gradation, and of course luxury and quality.

All the rugs in this Collection are hand-knotted from hand-spun, hand-dyed wool or bamboo silk, and so feature gentle abrash tonal variations that bring the rugs, and the spaces they lie in, to life.

Source Mondial holds an impressive number of rugs in stock, but if we don't hold the right variation rug in stock for you, a member of our specialist team would be pleased to advise and assist with achieving the perfect rug for you and your home.
